

NM DOT - Is there a central website to gather this information being discussed, including projects?

- <http://monsoonsafety.org>
- Add in discussion areas, and ongoing projects, list of successes
- Host for presentation slides and contact information
- PSA links, land use issues and strategies, weather stuff, etc.
- Research projects and opportunities

USDA input...

- Detection and prediction well covered, need more emphasis on mitigation
 - Gov. task force a resource
 - Expand into these groups to grow the conversation
 - NM BLM another player
- Focus on dealing with abandoned cropland and rangeland areas
 - Who manages the land?
 - USDA available to share messages and perform actual mitigation efforts
 - Just need a willing entity
- Other mitigation resources (Owen's Lake?), north China and Africa
- Need to fully identify hot spot areas, are these resources available? GIS?

Agriculture Research Service - 3 National laboratories, with info/experts available.

- Future member of discussion

How do we prevent dust hot spots? Think long term. Educating farmers and land owners.

Suggestion...focus on mp 211 to 219 to tackle the problem.

Advancing lead time to capture events through pre-positioning supplies and equipment.

- NMSU
- Position sensors in most active areas.
- Build a solid case before moving forward
- Identifying why certain locations are problem areas.

Dust contact group available as a resource. Farm Bureau. Maricopa County Clean Air Council

- Alerting system available, sent to farmers, etc.
- Tie in NWS products

Bring public health sector into the discussion.

- Build a broader scope, include a summary paper in the future

Follow-up workshop after dust season?

- Online availability

How do we verify how consistent our messages are?

- All messages available on the online resource

Utilizing other svr weather safety messages to tie into dust issues

- Commercial truckers and fleet software

- Frequent updates at a regional level (fleet management)

What communication resources are available?

Identify hazard areas and share with Google and o`ther traveling sites

- Anybody have a contact with Google?

Strategic Highway Safety Group

- Natural risk focus group

Integrated Warning Team organization
